

# Explosion-proof models of non-standard electrical distribution boxes in North Asia

## Overview

Custom non-standard explosion-proof enclosures can be designed based on customer electrical schematics, with detailed drawings included in quotations.

## Key Takeaways

Explosion-proof, non-standard electrical distribution boxes in North Asia are available from multiple manufacturers offering customizable, certified enclosures for hazardous industrial environments.

## Key Manufacturers and Models

Shenzhen Aimiqu Technology Co., Ltd Offers PLC cabinets, inverter control cabinets, power cabinets, and fan control cabinets with explosion-proof options. Their products are highly customizable, integrating automation, digitalization, and networking features. They provide OEM services and support for industrial applications such as factories, airports, and large public venues, with components sourced from recognized national brands.

Helonex HLDP03-Series The HLDP03-Series explosion-proof distribution boxes allow flexible combination of boxes to meet various distribution system requirements. Customization is available to comply with certificate usage restrictions, including the number of cover components and side holes for dissipated power and mechanical strength. MAMX02/03 Series These explosion-proof control and distribution boxes are designed for hazardous areas with explosive gas or combustible dust.

They comply with ATEX, IECEx, and GB/T standards, feature heavy-duty flameproof enclosures, precision CNC manufacturing, hydrostatic pressure testing, and full functional inspection. Non-standard designs can be created based on customer electrical schematics.

C

Z Electric Co., Ltd CZ specializes in wholesale explosion-proof electrical equipment, offering modular, certified components suitable for harsh environments. Their products meet CCCEX, ATEX, and IECEx certifications, and are designed for easy on-site maintenance without specialized knowledge.

C

Z emphasizes stability under extreme temperatures and UV exposure. R.

## **STAH**

L Terminal and Junction Boxes Provides both standard and custom-made terminal boxes for hazardous areas. Their products are certified for global installation standards and can be quickly delivered through their "Fast line" for standard models. Custom designs are available for complex industrial projects.

## **Features and Considerations**

Customization: Non-standard models can be tailored to electrical schematics, enclosure size, hole configuration, and internal component layout. Compliance: Most North Asian manufacturers ensure compliance with ATEX, IECEx, GB/T, and CCCEX standards for explosion-proof safety. Durability: Heavy-duty flameproof enclosures, hydrostatic pressure testing, and modular designs enhance reliability in hazardous environments.

Maintenance: Modular and standardized designs allow easier installation and maintenance, even without specialized explosion-proof training. Applications: Suitable for industrial power distribution, PLC control, automation systems, and environments with explosive gases or combustible dust. These options provide a range of customizable, certified, and reliable solutions for industrial electrical distribution in hazardous areas across North Asia.
