

Fireproof cable trays are steel cable trays

Overview

Fireproof Tray: Secure & Durable Solutions for Industrial Use Looking for a reliable fireproof tray?

Discover top-rated, customizable options with fire-resi.

Key Takeaways

Steel fireproof cable trays typically range from \$15 to \$150 per meter, depending on material, type, size, and customization options.

Price Range Overview

Steel fireproof cable trays are available in various types, including ladder trays, solid-bottom trays, trough trays, and wire mesh trays, each affecting the cost. Standard steel trays generally start around \$15-\$30 per meter for basic galvanized or powder-coated models, while heavy-duty or fully customized fireproof trays can reach \$100-\$150 per meter or more, especially for large widths or specialized coatings. Stainless steel options, which offer superior corrosion resistance, are typically at the higher end of the price spectrum.

Factors Affecting Price

Material: Galvanized steel is more affordable, while stainless steel or high-grade fireproof composites increase cost. Tray Type: Ladder trays are generally less expensive than solid-bottom or wire mesh trays due to material usage and manufacturing complexity. Dimensions: Wider or longer trays require more material, increasing the price.

Widths can range from 50mm to 1200mm, and lengths are often customizable. Surface Finish: Options like pre-galvanized, electro-galvanized, HDG, powder-coated, or painted finishes affect durability and cost. Customization: OEM/ODM services, special fireproof coatings, or unique structural designs can significantly increase the price.

Supplier and Location: Prices vary by manufacturer, shipping distance, and local market conditions. Suppliers in China, for example, offer high-volume production with competitive pricing.

Supplier Options

Alibaba lists multiple suppliers offering fireproof steel cable trays with customizable dimensions and finishes, suitable for industrial and commercial installations.

Made-in-

China suppliers provide high daily output and flexible OEM/ODM services, with fireproof coatings and corrosion-resistant designs.

CE

F (UK) offers stainless steel cable trays for long-lasting installations, ideal for environments requiring high durability and corrosion resistance.

Recommendations

For budget-conscious projects, standard galvanized ladder trays are cost-effective. For high-risk or industrial environments, consider stainless steel or coated fireproof trays for enhanced safety and longevity. Always request pre-production samples and final inspection to ensure quality and compliance with fireproof standards.

By considering these factors, you can select a steel fireproof cable tray that balances cost, durability, and fire safety requirements.
