

How much does a cable tray cost in Hungary

Overview

Cable Trays | AVIUS.hu GRP Cable Trays are used in highly corrosive environments. Completely metal free solutions can also be offered on request. GRP is tran.

Key Takeaways

Cable tray prices in Hungary typically range from €10 to €50 per meter, depending on material, type, and customization.

Price Overview

The cost of a cable tray in Hungary varies widely based on material, design, and size: Material: Galvanized steel trays are generally the most affordable, ranging from €10–€20 per meter, while stainless steel or FRP (fiberglass reinforced plastic) trays can cost €25–€50 per meter due to higher durability and corrosion resistance. Type: Ladder trays, perforated trays, and trough trays differ in price. Ladder trays are common and moderately priced, while fully perforated or custom-shaped trays may be more expensive.

Customization: Special coatings, large spans, or electromagnetic transparency (as in GRP trays) can increase costs.

Additional Factors Affecting Cost

Length and width: Wider or longer trays require more material, increasing the price. Fittings and accessories: Elbows, tees, and supports are sold separately and can add 10–30% to the total cost. Installation: Labor costs in Hungary vary, but professional installation may add €5–€15 per meter depending on complexity.

Supplier and brand: Local suppliers like Emtron KFT, AVIUS.hu, and other Hungarian distributors offer competitive pricing, but premium brands or imported trays may be higher.

Practical Advice

For budgeting purposes, a standard galvanized steel ladder tray for indoor use can be expected to cost around €12–€18 per meter, while stainless steel or GRP trays for corrosive or outdoor environments may reach €40–€50 per meter. It is recommended to request quotes from multiple suppliers to account for material, size, and delivery options. By considering these factors, you can select a cable tray solution that balances cost, durability, and project requirements.
