

How to wind the pigtail cable inside the frame

Overview

Start by removing any restrictive entry ports where the cable enters the frame. Then undo the inner wire at the derailleur end and pull it through the outer housing. Internal cable routing for a mountain bike frame doesn't need to be a thing of mystery. Sam James shows us how to make it simple. Read our editorial guidelines [here](#). The only catch is that you'll need to find yourself a double ended barb like the ones that are supplied with a RockShox Reverb. What are the solutions for moving cables UNDER the frame from its top?

(without welding) But it's interesting to see if anyone has done this and how. Yeah there's not a lot of options. You could forego the cable stops entirely and just. This startling statistic highlights why mastering reliable techniques like pigtail installations is critical for safety and performance.

Article Content

How-to: Dealing with Internal Cable Routing

With the inner wire removed, partially thread the barb into the old outer cable. Once it starts to wind itself in, place the new length of outer cable on the other end of the barb.

How to move the cables under the bike frame? :

Yeah there's not a lot of options. You could forego the cable stops entirely and just run full length housing. And then zip tie the cable housing to the frame

wiring pigtails

Through this guide, we've shown how pigtail methods create durable bridges between multiple conductors and terminals. These short connectors protect your circuit by isolating faults, ensuring

how to put cables inside your carbon bike frame

Begin by inserting the cables into the designated entry point of the frame. Use a cable guide if necessary. A cable puller can help guide the cables through tight spaces within the frame.

Tricks for Internal Cable Replacement

As long as it didn't break inside the frame, it's easier to leave the broken cable in place. With the broken cable in place, all you have to do is to cut a piece of
