

Price of one meter of cable tray

Overview

Cable Tray Price Per Meter: Market Analysis & Cost Discover the key factors affecting cable tray price per meter, including materials, demand, and competit.

Key Takeaways

The price of a 1-meter cable tray ranges from approximately \$2 to \$25, depending on material, type, and finish. Cable tray prices vary widely based on material: galvanized steel is common and cost-effective, stainless steel offers superior corrosion resistance but is more expensive, aluminum is lightweight and rust-proof but pricier than steel, and plastic trays are the most budget-friendly but unsuitable for heavy loads. Tray type also affects cost: ladder trays are more expensive but support heavy cables well, perforated trays are moderately priced, and wire mesh trays are cheaper and ideal for lightweight wiring.

Surface finishes like hot-dip galvanization (HDG), powder coating, or pre-galvanized steel influence durability and price, with HDG being the most durable and costly. Regional and project factors can further impact pricing. Bulk orders often reduce the per-meter cost, while labor, shipping, and installation complexity add to the total expense.

For example, in India, a 300 mm GI perforated cable tray costs around ₹330 per meter, illustrating how size and material affect pricing. In summary, when budgeting for a 1-meter cable tray, expect \$2–\$25 per meter, with the final cost determined by material, tray type, finish, and project-specific factors. Choosing a slightly higher-quality tray may offer better long-term value due to durability and lower maintenance requirements.
